

2. EAR, NOSE & THROAT PROBLEMS

Tinnitus (ringing in the ears) - Menieres - Vertigo

Tinnitus is often perceived as a high-pitched whistling sound which is much more noticeable in quiet surroundings. It often accompanies degeneration of the hearing nerve, thus hearing loss is also sometimes experienced. It is a very difficult condition to treat, but Electro-Acupuncture offers relief in a considerable proportion of patients. This represents a substantial improvement on conventional approaches to the problem.

PRIMARY POINTS

Always treat the primary points. If time allows, also treat the secondary points.

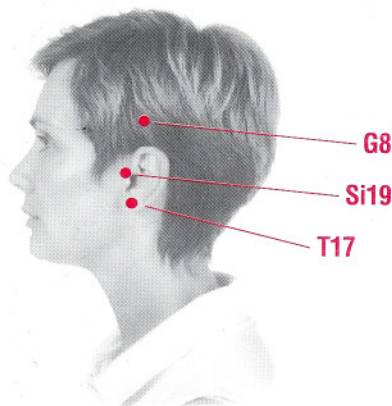

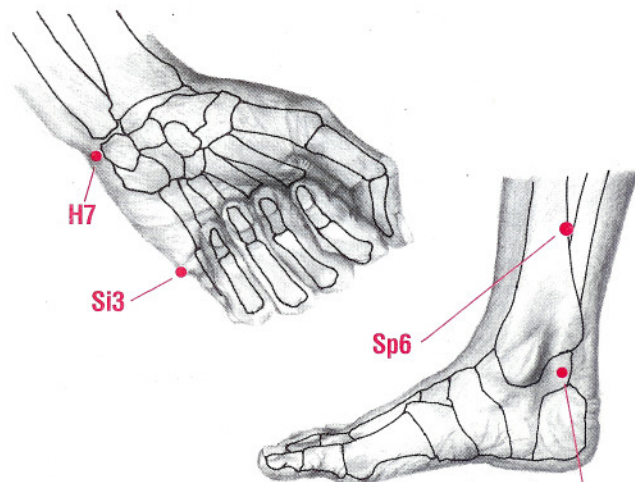

G20 Just below the skull bone and outside the muscle bulge.

K3 This lies midway between the tip of the inner ankle bone and the achilles tendon (in the hollow)

Si3 With the fist clenched, this lies at the end of the main crease of the palm at the junction of the red and white skin (It is easier to locate unclenched).

Si19 This is immediately over the jaw joint between the jaw and the skull, just in front of the small piece of cartilage, which forms the front part of the ear.

T17 This point lies in the hollow behind the earlobe between the mastoid bone and the angle of the jaw.
